# Natural Look...Solid Feel...Easy Installation.

## NATURAL SLATE APPEARANCE

RoofRoc tiles offer the sleek, distinctive look of slate - a style that compliments any traditional or modern design - at a much more affordable price. Thicker, more textured, and with better performance, RoofRoc lends an element of prestige that is impossible to achieve with asphalt, metal or concrete roofing.

## EASY TO HANDLE EASY TO INSTALL

RoofRoc Slate weighs much less than traditional roofing materials but will stand up to even the harshest jobsite environment. Its tough, but light, construction can withstand heavy roof traffic and won't crack like slate when applied using a pneumatic nailer.

## RECYCLED SUSTAINABLE

In a world of diminishing resources, RoofRoc Slate offers an unique opportunity to purchase a strong and attractive roofing material while promoting sustainability through the use of recycled products.

## CLASS A FIRE RATING

RoofRoc Slate has been thoroughly tested and approved by the International Code Council, where it passed their rigorous testing procedures and received a "Class A

Fire Retardant Roof Covering" distinction.

## 50 YEAR WARRANTY

RoofRoc Slate is so durable, solid and dependable that we offer it with a 50 Year Limited Transferable Warranty.
